# Azeez Olabode

## A full-stack developer

📍 Oyo state, Nigeria ✉ dataslid@gmail.com 📞 +2348142700835 ⓘ http://www.github.com/azeez010

↖ www.dataslid.com  in https://www.linkedin.com/in/abdulazeez-olabode-52a81019b/

## Profile

I am a full-stack developer with more than two years of experience. My expertise is in web development and web UI testing ( with selenium ). I use react.js to create beautiful and responsive UI while I use Flask, Django, and express.js ( Node.js ) on the backend and I also understand how to use SQL and MongoDB queries, though I prefer to use an ORM to speed things up!

## Skills

### Web development

*Javascript, jQuery, SQL, python, React.js + redux, node.js + express.js, mongoDB, python and most importantly willingness to learn a new one when needed.*

### Others

*Linux, bash, some AWS services, basic networking, redis, nginx, good communication skills etc.*

## Projects

**Virtual Sport betting client** ⧉                                      11/2020 – 11/2020

*An application i built to simulate how sport betting works.*

- This project is entirely based on HTML manipulation with vanilla js.
- I used tailwind.css for the styling.
- This project taught me a lot about problem solving because i had to break the problems apart and tackle them independently.
- I also learnt how to make proper research when stuck because i had to write an algorithm from scratch to match an array of 20 simulated teams to one another except themselves like they do in football.
- There are a lot of logics in the program which means i am capable of writing programs that requires huge amount of logics.

**Simple Job Api**                                                       08/2020 – 08/2020

*Job listing Api with express.js*

I used Node.js + express.js to design the job listing API

### Africonn - An African community
*An African forum with jobs, polls, and blogging systems for the community*
- I cooperated with designers to create clean interfaces and simple, intuitive interactions and experiences.
- I developed the project concepts and maintain optimal workflow.
- I completed detailed programming and development tasks for front-end public and internal websites as well as challenging back-end server code.
- I carried out quality assurance tests to discover errors and optimize usability.
- I deployed the site using AWS Cloud Infrastructures
- This project was built with Django python

### A Betting app ☐
*Dice front-end based application for betting*

I made the application with HTML, vanilla JS and w3.css, I had fun building the program, I made the project because I have always been fascinated by how casino sites works until I decided to build one, you wanna test it, click on the **'A Betting app'** link above, the login is **Azeez**

### CBT Application ☐
*a cbt app for students*

I made a CBT Application, inspired by JAMB CBT programs with frontend tools like react.js and redux and custom CSS

### An Investmest Site
*For people to invest funds and make money after a while*
I was contracted by a client to build an investment site and below is how I came up with the solution in less than two weeks

- I made plan on how to solve the problem and created the Database Table Structure and its relationships
- I used python's flask to write the backend and all the business logics while jQuery, tailwindCSS and HTML were enforced on the frontend
- I deployed the solution on a DigitalOcean droplet (a shared Ubuntu server)

### Console based projects
*a lot of console based projects i.e. Projects without User Interface.*

- Console based food ordering system
- Betting bots
- Whatsapp bots
- Whot Game
- ATM Machine software

## Professional Experience

**A full-stack dev**                                                          09/2020 – 03/2021
*Dataslid Software Company*                                                      Lagos, Nigeria
- I was tasked with developing full-stack applications from prospective clients.
- I used the MERN stack during my stay at the company
- I learned new frameworks and libraries such as next.js during my stay.

**A full-stack developer**

*iTeesoft Digital Agency*

02/2019 – 03/2020
Ibadan, Oyo State,
Nigeria

I was involved in the development of solutions for the clients of the firm, we worked on quite a lot of solutions which I often participate in. I worked with React.js, Django and wordpress while at the firm.

## Publications

**how to calculate your future wealth with python** ⧉

*By me*

I wrote python on screen to predict one's future wealth!

**How to create a remote windows machine for free** ⧉

*By me*

In that video, I demonstrated my ability to use Cloud resources to solve problems, I specifically used an AWS ec2 instance (windows machine) in that video.
